

PU STONES & LEAFS

ABOUT US

- We offer a wide array of panel sizes, ranging from 200x900 mm to 600x1200 mm, providing flexibility for various design needs.
- With precise craftsmanship and cutting-edge technology, we transform interior and exterior spaces into inspiring environments.
- Experience the superior quality and creativity in

- Realistic Appearance
- Durability
- Eco-Friendly
- Ease of Installation
- Temperature Resilience
- Waterproof
- Thermal Insulation
- Versatile Aesthetics
- Secure Installation
- Fire Resistance

Realistic Appearance

ARCHEDGE supplies are meticulously crafted to mirror the look of natural stone.

Through precise moulding and specialized finishing techniques, they achieve a lifelike and refined appearance that is virtually indistinguishable from genuine

Durability

Engineered with high-quality polymer materials and coated with multiple layers of robust finishes,

ARCHEDGE supplying panels are designed to withstand environmental challenges such as acidity, sunlight, and UV radiation, ensuring an extended lifespan and cost-effectiveness.

Eco-Friendly

Engineered with high-quality polymer materials and coated with multiple layers of robust finishes,

ARCHEDGE supplying panels are designed to withstand environmental challenges such as acidity, sunlight, and UV radiation, ensuring an extended lifespan and cost-effectiveness.

Ease of Installation

Designed for user-friendly application, ARCHEDGE supplying panels can be installed on almost any dry, flat indoor surface without requiring specialized skills. Their innovative interlocking design, featuring tongue and groove edges with pre-set seams, allows for straightforward installation using screws or nail guns, significantly reducing project completion time compared to traditional stone products.

Fire Resistance

ARCHEDGE supplying materials are safe for installation around fireplaces, eliminating concerns about potential wall damage.

Waterproof

Our products feature a proprietary coating that provides both waterproof and flame-retardant properties.

Crafted primarily from polyurethane (PU) and enhanced with anti-corrosion polymers

This lightweight design allows for single-person installation without the need for heavy machinery.

Thermal Insulation

Our PU stone panels offer excellent thermal insulation, integrating the benefits of external insulation systems.

Versatile Aesthetics

ARCHEDGE we supply's styles are adaptable to various designs, featuring rich textures and diverse shapes, with customization available to meet specific requirements.

Secure Installation

Our PU stone panels can be securely affixed to walls using prefabricated methods or specialized adhesives, ensuring a high safety factor.

Temperature Resilience

Our products maintain integrity across a wide temperature range, from -20°C to 120°C.

Soundproof
